Pathfinder

Maddie, Nic, Patrick, Thomas

Project Description

Pathfinder is an all-in-one career development web application designed to guide users through every stage of their professional and educational journey. It leverages OpenAI for natural language processing, Firebase for data management, and modern web technologies to deliver a seamless and intuitive user experience.

Project Description Cont.

Career Questionnaire

Resume Analysis

User Dashboard

Cover Letter Generator

Job Matching

AI-Assisted Chatbot

Learning Resources

Networking Tools

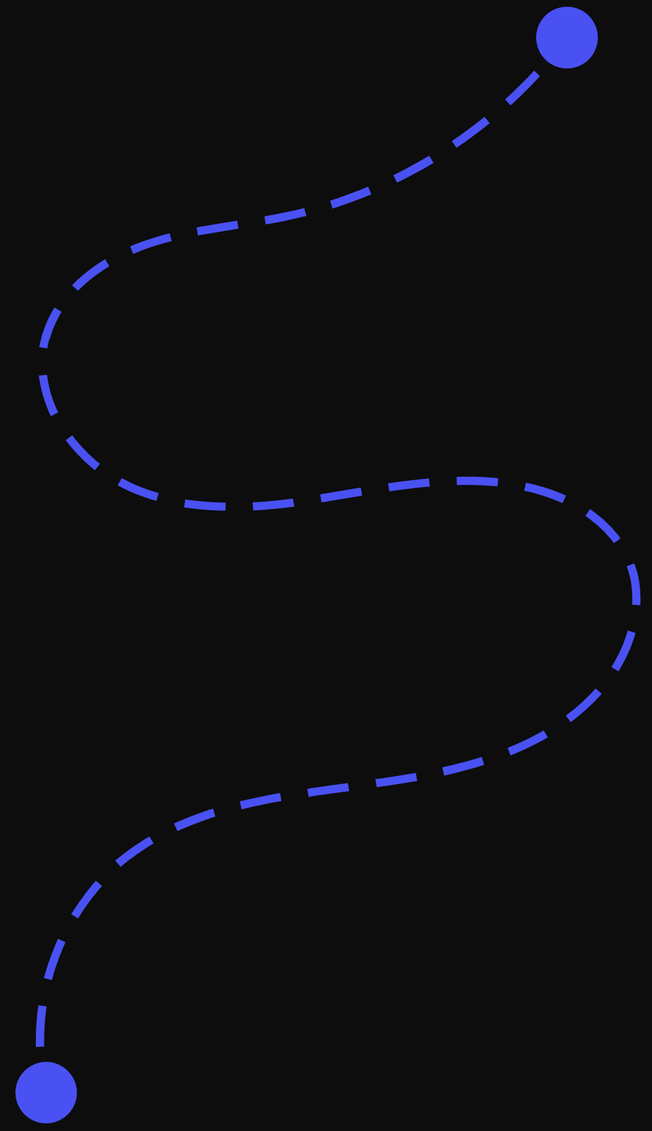

Project Goals

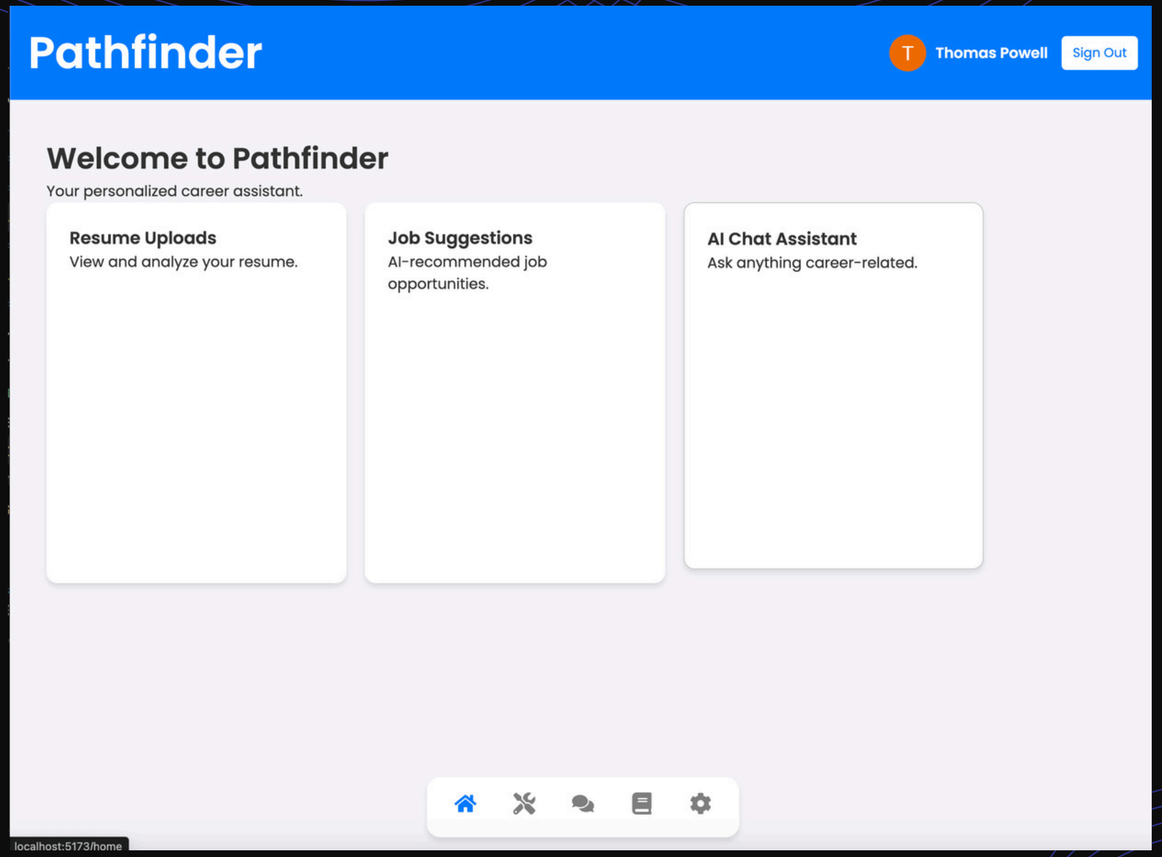

- Make the job search process easier and less overwhelming
- Help users discover new career paths and opportunities
- Provide personalized tools for career growth and development
- Centralize all career planning resources in one platform

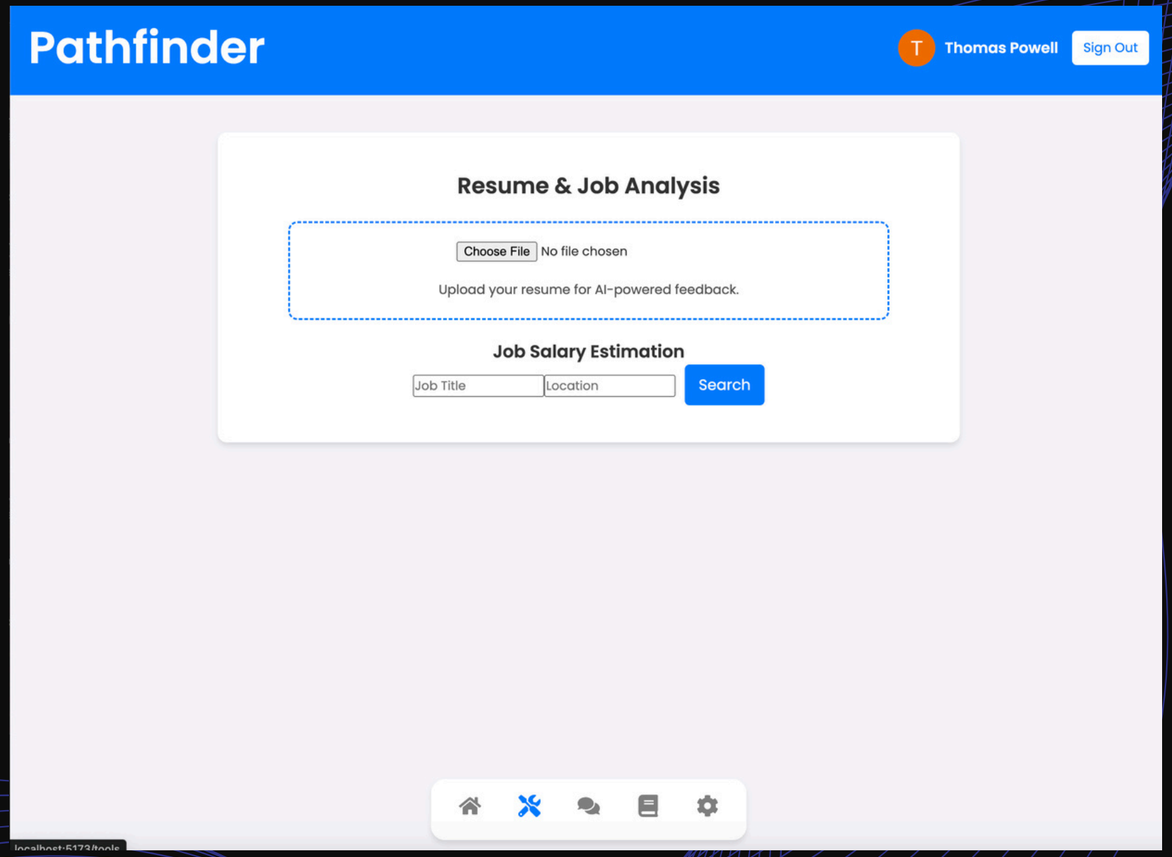

Why Pathfinder?

- Job hunting is stressful we wanted to make it easier
  - especially for seniors graduating in 2 months, but thankfully we have this class!
- Designed to be approachable and helpful for everyone
- Encourages users to learn more about their own career journey
- Give us valuable experience building a real-world product

User Interface

Demonstration

Project Challenges

Firebase Storage

- User Information
- Questionnaire results
- PDF of Resume

Implementing the OpenAI API

- Figuring out cost of tokens and amount of tokens needed to test queries

Status Update

- We our currently testing our implementation of OpenAI for our chatbot
- Wrapping up our implementation of the Resume and Job Analysis page

Punch list

- Fine tune the prompts we use for resume assistance (high priority)
- Improve aesthetics of user interface (medium priority)
- Relevant, recent job postings via API (low priority)

Thank You!
